

Imagine No Boundaries

Videoconferencing provides you with **face-to-face collaborative communication** through real time transmission of video, audio and data sharing. Participants not only see and hear one another, they can also utilize traditional presentation tools during a videoconference. In addition, your session can easily incorporate a PowerPoint presentation or display hardcopy materials through a document camera. You even have the option to videotape your meeting for future reference or documentation purposes.

Videoconferencing has arrived and you can use it to give your business a measurable advantage in the marketplace. Just one call to The Chariot Group, Inc. will connect you to all that this new technology has to offer.
