

Polycom® Judicial VSX® Collaboration Systems

Secure, cost-effective, high performance solution for judicial, legal, and penal applications

Benefits

Lowers costs and saves time

- Eliminates costs and travel time involved in transporting detainees and inmates to off-site locations
- Makes more efficient use of courts and officers' time
- Accelerates judicial process by eliminating logistical barriers of time and distance

Strengthens security

- Removes security risks associated with removing suspects from holding facilities to appear in court

Enhances communication experience

- Promotes involvement and representation of participants in hearings, arraignments, and other judicial proceedings
- Allows for remote translations whether for foreign languages or sign language
- Makes it easier for inmates to communicate with correctional, legal, psychiatric, and judiciary representatives

Easy to use and maintain

- Minimizes operational concerns
- Enhanced audio system includes amplifier, microphone, and safe armored handset for private communications
- Easy-to-clean and durable system

Built to withstand tough treatment

- Designed for a variety of secure environments
- Secure cabinet with steel construction, an unbreakable Lexan® shield, and lockable panels

With today's greater emphasis on security, video conferencing is now an essential tool in judicial, legal, and penal environments. In addition, it saves time and money by bringing the courtroom to the inmate, instead of the other way around.

However, not just any video conferencing solution will do. Polycom's Judicial VSX Collaboration Systems are specifically designed for the unique requirements of these applications.

Increases communication while reducing costs

Polycom's Judicial VSX Collaboration Systems support one-to-one and one-to-many communication in courtrooms, offices, conference rooms, prisons, visitation centers and other meeting areas. By providing everything from enhanced audio to a removable work surface, it offers a more efficient way to enable greater communication while decreasing travel time, security risks, and transportation costs. To begin with, the Judicial Collaboration Systems eliminate the need for hundreds of daily trips between court locations and correction facilities. In prisons, the system can be made available to prisoners and their attorneys, so they can confer and appear before the court via video. It also allows parole boards to include victims in hearings. Additionally, the Judicial Collaboration Systems help reduce congestion in holding cells and in the courthouse.

Applications that go beyond the obvious

Aside from judicial, legal, and penal applications, the Judicial VSX Collaboration Systems can also be effectively used for the following:

- Video arraignments, warrants, and parole board hearings
- Video-enabled courtroom presentations such as expert witnesses
- Remote testimony by specialists, inmates, and officers
- Psychiatric evaluations and consultations
- Rehabilitative distance learning programs
- Meetings between inmates and legal counsel or government representatives
- Translation of foreign language or sign language
- Judicial consideration of appeals and visitation

Make Great Things Happen with Polycom Judicial Collaboration Systems

In today's Internet driven world, the ability to conduct real time communication and collaboration has become critical to an organization's survival. As the market leader in voice, video and content collaboration and communications, our award-winning conference technology makes it easy for people to interact and maximize productivity — over any network, in just about any environment, anywhere around the globe. That's why more organizations worldwide use and prefer Polycom conferencing solutions. Because when people work together, great things happen. See how you, too, can achieve great things with Polycom Judicial Collaboration Systems.
