

## Write, save, share

### SMART Business Solutions

Every meeting should be a chance for your business to improve productivity and results. SMART solutions can help you create these opportunities by making meetings visual and interactive, so you can work with information in more meaningful, effective ways. You can quickly and easily share information, concepts and plans or conduct discussions and brainstorming sessions. You can also effortlessly capture notes and distribute them for future reference, ensuring that all participants have a record of the meeting's results.

#### Write

With SMART Business Solutions, you can access your files, run applications and browse the Internet with a touch of your finger on a large interactive display. Our solutions enable you to write notes in digital ink, insert screen captures, and work with multiple applications to present information.

#### Save

When the meeting is done, marked-up pages can be saved as a single PDF or PPT file. You can also write in digital ink in Microsoft® Word, Excel® and PowerPoint® files, as well as AutoCAD® and Adobe® Acrobat® files, and save your work in the native format – complete with digital markups. Imagine: no more “do not erase” signs needed to protect your work in the meeting room.

#### Share

Meeting notes can easily be distributed immediately following the meeting. Because the notes can be saved in either PDF or PPT format, the files are easily accessible to everyone. This allows teams to revisit information in the future as necessary.
