

VidyoDesktop™

VidyoDesktop for Windows and Macintosh is the HD software client component of the VidyoConferencing™ solution. With the VidyoDesktop, users can individually control the dynamics of their audio and visual experience during the conference. A user may choose from multiple layout options separately from any other user. The VidyoDesktop provides features such as application-sharing and “preferred, voice-activated speaker” window, plus a variety of camera and audio controls.

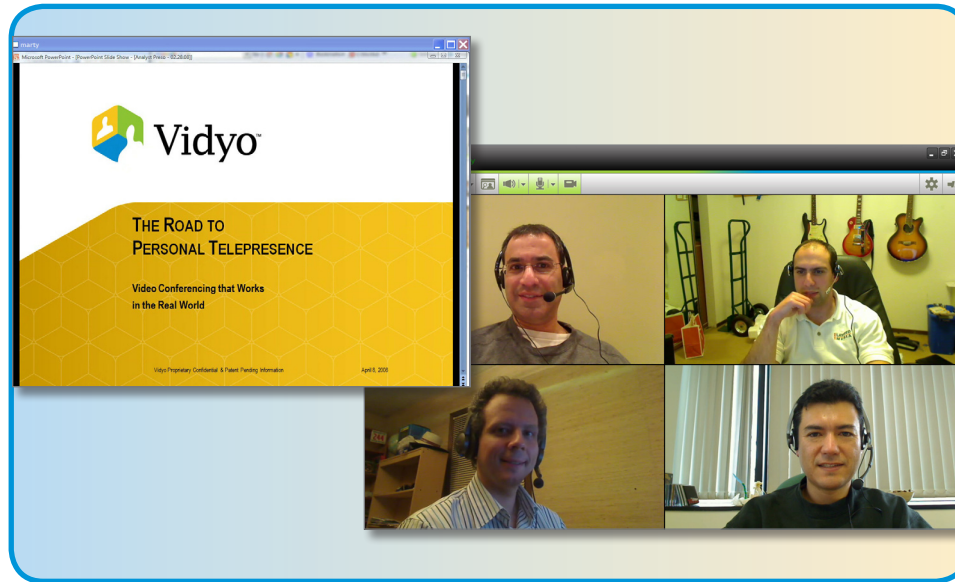

VidyoDesktop is easy to use and manage via the VidyoPortal™. All users are assigned a personal Meeting Room that can be PIN-protected, thus making it possible for meetings to be held anytime — whether impromptu or by prior arrangement. Finally, the same reservation-less conferencing capabilities for video that have long been available for voice and the Web!

Features and Functions:

- Intuitive graphical user interface
- Client software is automatically downloaded upon login to VidyoPortal whenever a new update is available
- Encodes up to Sub-HD and decodes up to HD on an Intel Core 2 Duo-based computer
- Every VidyoDesktop client can share an application window simultaneously
- Control personal screen layout, orientation and size
 - Real full-screen support
 - Control number of viewable participants
 - Toggle between all participants equal and preferred larger voice-activated speaker (1+N layout)
 - View other user's shared application – integrated in the video screen (docked) or on a separate window (undocked)
 - Toggle between different shared applications
 - Self-view
- Privacy mode – user can “mute” transmission of video and/or audio
- Automatic Firewall Traversal Mode (tunneling over port 80 or 443) and STUN support
 - HTTP Proxy support
- Automatic Adaptation to CPU utilization
- Acoustic Echo Cancellation

VidyoDesktop Specifications

Participants can share any window, and any viewer can make the Vidyo windows any size they desire.

Specifications

Specifications	Windows PC	Macintosh
